The Town of Orono is an Equal Opportunity Employer and Service Provider

Bennoch Road Roadside Clearing Project - The scope includes clearing dead wood and hazard trees from the roadside that are growing under and into the communication lines and hanging out over the road. All of the work will be done on the river side of the road. Larger healthy trees will not be removed, but may be pruned to mitigate utility conflicts. Healthy vegetation on the embankment will be left to ensure continued stability of the slope.

This project will be completed in two phases. First, Public Works staff will remove and chip anything that can be reached safely from the ground. This will include much of the deadwood that has fallen or broken off and smaller brush that is within the 12'-16' clearing area under the wires. Next, a contractor will finish the work, removing and pruning trees that require an aerial lift.

There may be some time between the first and second phases depending on the weather and work schedules for both Public Works and the Tree Service. All of the work is anticipated to be completed by mid April.
